

Fall Protection Usage and Proper Tie-Off Points

- **SCAN** for Falls Checklist
- Choose the right fall protection equipment
- Have you been trained on the equipment?
- Select an approved anchor point – See list below of approved Tie-off points
- Complete pre-use inspection of fall protection equipment
- Ensure adequate clear fall space
- Never work alone in fall protection
- Look for hidden hazards

Remember your approved Tie-off Points

- Structural beams 6" in depth or >
- Pipes 4" or > for one person
- Nozzles 3" or > for one person
- Approved scaffolding components:
 - Horizontals that are secured with a Cuplok on each end
 - Cuplok Connection: Tie off to scaffold components secured with these.
- Permanent platform handrails posts below mid rail for one person.
