

Lannon Tank

C O R P O R A T I O N

This letter applies to all makes and models of steel tanks that we have manufactured in any time period including all:

Single Wall, double walled, jacketed tanks, STI P-3, ACT-100 Permatank and Elutron underground jacketed tank as well as non-UL storage vessels.

All steel tanks are compatible and suitable for use with all blends meeting SSTM standards, including ethanol blends from E-10 to E-100. All tanks are also compatible and suitable for use with all blends of biodiesel, from B2 to B100. Testing has been done proving compatibility of steel by several sources including Oak Ridge National Lab sponsored by DOE in collaboration with UL and NREL, SwRI, DNV and STI (through Battelle). To access test reports and other information on biofuels, see STI's website for test data and information on biofuel testing and steel compatibility.

As always, if switching product services, the tank system should be properly cleaned. See STI Recommended Practice, R-111, "Storage Tank Maintenance" for further information.

If you have any questions about our products or about this statement, please contact the sales dept. at Lannon Tank Corp., 20134 W. Main Street, Lannon, WI 53046 or Ph#262-251-7890.

Respectfully,

Kenneth Stowell,

President
