Overhead Hazards

There's a lot going on out there. Whether it be above you, below you, or next you. What can you do to keep yourself and others safe?

- Avoid stacked work.
- All scrap metal, bolts, and tools should be removed from decks, platforms, and scaffolds to prevent accidental kick-off.
- When transferring small material from overhead, use a suitable container to lower material. (canvas bags only)
Secure all tools (tool lanyards)

- All areas where overhead works is being performed will be barricaded. Don't stand under loads.
- During crane overhead lifts ensure the area is barricaded and free of personnel
- When red "DANGER" barricade tape is up DO NOT ENTER, walk around
- Crane operator shall sound the horn to notify personnel an overhead lift is being performed.
- When lifting material overhead a tag-line will be attached

Dont forget to Communicate!
